2010 Year of novelties
and newcomers in the sector:
exhibit!

1 - 3 JUNE
LYON EUREXPO - FRANCE
LYON 2010

In partnership with
Cluster
Lumière
Performance & Innovation

The International event 100% dedicated to lighting

www.international-lightweek.com

International Light Week in figures:

- 12 000 visitors
- 350 exhibitors
- 25,000 m² of exhibiting surface area
- 3.5 km of visitor aisles
- 400,000 invitations sent out
- 55 technical workshops and conferences bringing together over 1500 conference attendees
- 30 nationalities represented

Who is exhibiting?

Street and outdoor lighting

- Street and urban
- Architectural and landscaping
- Festivals and events
- Safety
- Specialised (tunnels, airports, sports venues...)

Indoor lighting

- Architectural
- Technical
- Decorative
- Tertiary
- Shops
- Natural
- Stage
- Safety
- Specialised (museums, hospitals...)

Accessories and components

- LEDs
- Lighting sources
- Ballasts, transformers, devices
- Wiring termination technology
- Electronics

New technologies and services

- Lighting management and control
- Installation, operation and maintenance of electric networks
- Power production and distribution
- Research and services

3 good reasons for exhibiting!

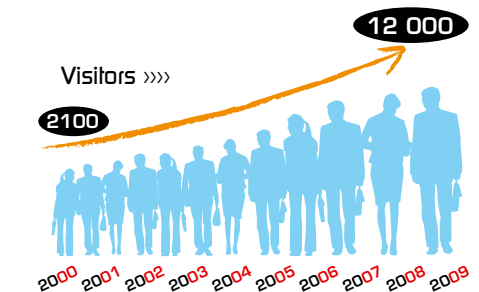

- > Boost your business
- > Become better known
- > Develop all of your markets

Who visits?

Professionals looking for innovative solutions and skills!

With the changing market and the emergence of new requirements, visitors come to the **International Light Week** to discover the very latest technological innovations.

- Local authorities
- Public institutions
- Lighting designers
- Town planners, architects, landscape designers
- Interior designers, stage designers
- Fitters, design offices
- Technicians, engineers
- Builders, real estate developers
- Distributors and buying groups
- Retail industry (specialised shops, shopping centres, franchises...)

LUMI
VILLE

The international tradeshow for public and outdoor lighting

Visible elements which benefit all inhabitants, lights and light furnishings have gone beyond their initial role of ensuring public safety and now fully contribute to creating a city's identity.

Faced with an increasing demand for quality and safety, lighting is an issue with significant political added value: local authorities must reconcile environmental concerns, cost control and the observance of lighting technology standards.

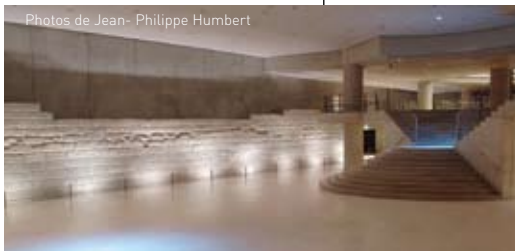

As the sector's major event, LumiVille has established itself as a showcase of innovative solutions for durable, cost-effective and high-performance lighting.

It is the ideal place for launching your products and exchanging information!

Two tradeshows, one unique 100% lighting event

inLiGHT EXPO

The international tradeshow for indoor lighting

Photos de Jean- Philippe Humbert

Indoor lighting is an endless source of decorative and architectural possibilities. A real scenographic material, light allows to take into account new ways of living and interpret relationships with space in different ways.

In an era of sustainable development, indoor lighting has successfully risen to a new major challenge: the environment, with solutions which reduce environmental impact and power consumption.

The only tradeshow in France entirely dedicated to indoor lighting, InLight Expo brings together, through a high-quality offering, all the innovative products and skills in the sector.

**Technical and decorative lighting,
home, office, shop and natural lighting:
the entire sector is represented!**

David Barbour /BDP

3 days dedicated to professionals to attract even more qualified visitors

Tuesday 1 June 2010: calling all fitters!

A technical day organised especially for fitters: planned in collaboration with the sector's main bodies, conferences and demonstrations will provide concrete solutions and outstanding innovations with respect to electrical installation and energy performance.

Wednesday 2 June 2010: a day devoted to key influencers

State-registered architects, interior designers, lighting designers, landscape designers, and design offices: key influencers are always on the lookout for innovations. Under the banner of innovation and sustainable development, they are invited to a venue reserved for discovering your products.

Thursday 3 June 2010: meet with distributors

Do you want to meet a distributor or sales representative? Establish business partnerships? Open a subsidiary or sales office?

International Light Week actively contributes to your business development in France and abroad. At seminars held in a dedicated venue, you will be able to benefit from advice and expertise given by specialised bodies.

The French lighting market

A business volume of 72 billion euros

A recovery scheme encouraging investments by local authorities

Lyon, city of light

The leading region in France for the lighting sector: an economic network of over 350 businesses and 12,000 jobs

Presence of large international groups: Philips, Schneider Electric, Siemens...

Place where the first Light Cluster was created in France

Wide range of high level research centres and technical training

Birthplace of the first city lighting scheme in the world

Why should you put the *International Light Week* in your diary for 2010 ?

- Because it is the only tradeshow in France entirely dedicated to lighting
- Because it brings together all the players in your markets around a comprehensive offering
- Because it presents the sector's latest technologies and innovations

You have the solutions, you are successful in your markets, join us!

They were at the trade fair
